PROFESSIONAL SUMMARY

Process Mining Consultant with 2.5+ years of experience in Celonis, SQL, and Python. I turn operational data into actionable insights to identify inefficiencies, define KPIs, and prioritize improvements and automation. I combine data modeling and transformation skills with direct client communication, requirements gathering, and Celonis Studio dashboard development.

SELECTED IMPACT: Identified or resolved 12+ process bottlenecks and delivered 70+ KPIs, dashboards, charts, and tables across Process Mining initiatives.

PROFESSIONAL EXPERIENCE

Consultant Analyst - Process Mining / Celonis | Inetum

Madrid, Spain | 2025 - Present

- Contribute to a project for the Generalitat de Catalunya focused on improving analysis of the housing assistance process through Process Mining.
- Manage direct client communication and requirements gathering; perform data extraction, transformation, and modeling to align the solution with business needs.
- Define KPIs and develop Celonis Studio dashboards to visualize process status and identify delays, inconsistencies, and bottlenecks.
- Delivered approximately 30 KPIs and visualizations and contributed to resolving more than 2 bottlenecks within the project.
- Technologies: Celonis EMS / Process Intelligence Platform, Celonis Studio, PQL, PyCelonis, SQL, and Python.

Software Developer / Full Stack Developer | Getronics

Madrid, Spain | 2023 - 2025

- Developed and maintained applications, connecting business needs with software solutions and process analysis.
- Contributed to POCs by evaluating technical alternatives, preparing demos, and validating proposals before development.
- Collaborated with technical and business stakeholders on process optimization and automation initiatives.
- Technologies: Spring Boot, Angular, Node.js, Celonis, SQL, and Python.

TECHNICAL SKILLS

Process Mining: Celonis, Process Intelligence, process analysis, KPIs, dashboards, bottleneck identification, and automation.

Celonis: EMS, Studio, PQL, PyCelonis, Action Flows, demos, and POCs.

Data and software development: SQL, Python, data extraction, transformation, validation, and modeling; Java, Spring Boot, Angular, Node.js, JavaScript, MySQL, and Git.
